

**Continuation of Call with DC Bell, C. Huneault and A/Supt. Bernier
Demo F-22 12 Feb 22**

- Rob and Christiane hang on to call
- Bernier – a lot of liaising with Executive (Drummond)
- Significant ask – we cannot just shut down a bridge
- [REDACTED]
- Bernier – ramps also – spoke to [REDACTED] to have a core hardening plan – have to work with City and OPP
- If OPP can't close down the ramps, then we cannot stop
- Bernier – wants high level discussion from Huneault
- [REDACTED]
- Bernier – who would be responsible from what government level and what level required
- If we are going to do it, need Government support
- Bell – trying to figure out opinion – give overview (Huneault)
- If you close the bridge, you lock down City – hospital workers, fine, but you breach other mobility rights (travellers)
- Chief has ordered closure – we will be facing charter breaches with respect to people's mobility – don't have authority from Municipal (Chief's) level
- [REDACTED]
- [REDACTED]
- Bernier – we are not dealing with either – cannot make something not here – use the situation that we currently have
- Bell – make the plans around closing the Bridges – going back to Chief to have the discussion with Chief
- See how we move ahead
- Bernier to engage Lucas – immediate action plan that needs to be in place – will connect with Hull and will get back to Bell
- Bernier – probably cannot happen – successful in some, not others
- Bernier – need to get to speak to Chief and Commissioner and advise that OPP close all the ramps
- Bell – what bridge closure looks like, off ramp closures, what would it look like to move traffic around
- Bernier – Lucas – officially notified that counterparts (OPP and QS) will not be closing bridges and off ramps at this point
- Bernier – Lucas will work with Traffic to try and snake traffic around elsewhere
- [REDACTED]
- [REDACTED]
- Bell – good plan
